Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group

1. Claims 1-3 drawn to invention with synthesis, replacing flip-flops of digital circuit with (buffers having a) negative delay, without HDL, breaking cycles by inserting flip-flops clocked by clocks all having a period of substantially zero
2. Claims 4-12 drawn to invention with HDL, replacing flip-flops of digital circuit with (buffers having a) negative delay, without synthesis, breaking cycles by inserting flip-flops clocked by clocks all having a period of substantially zero
3. Claim 13 drawn to invention with HDL, replacing flip-flops of digital circuit with point-to-point timing constraints, without synthesis, replacing flip-flops of digital circuit with (buffers having a) negative delay, breaking cycles by inserting flip-flops clocked by clocks all having a period of substantially zero
4. Claim 14 drawn to invention with constructing artificial/dummy flip-flops, HDL, computing a length of a longest path, without synthesis, replacing flip-flops of digital circuit with (buffers having a) negative delay and/or point-to-point timing constraints, breaking cycles by inserting flip-flops clocked by clocks all having a period of substantially zero
5. Claims 15-18 drawn to invention with HDL, breaking cycles by inserting flip-flops clocked by clocks all having a period of substantially zero, without synthesis, replacing flip-flops of digital circuit with (buffers having a) negative delay and/or point-to-point timing constraints

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required **because one or more of the following reasons apply:**

Art Unit: 2825

(a) The prior art applicable to one invention would not likely be applicable to another invention;

(b) The inventions have acquired a separate status in the art in view of their different classification;

(c) The inventions have acquired a separate status in the art due to their Recognized divergent subject matter;

(d) The inventions require a different field of search (for example, searching Different classes/subclasses or electronic resources, or employing different search queries);

(e) The inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Effective November 1, 2007, if applicant wishes to present more than 5 independent claims or more than 25 total claims in an application, applicant will be required to file an examination support document (ESD) in compliance with 37 CFR 1.265 before the

first Office action on the merits (hereafter "5/25 claim threshold"). See Changes to Practice for Continued Examination Filings, Patent Applications Containing Patentably Indistinct Claims, and Examination of Claims in Patent Applications, 72 Fed. Reg. 46715 (Aug. 21, 2007), 1322 Off. Gaz. Pat. Office 76 (Sept. 11, 2007) (final rule). The changes to 37 CFR 1.75(b) apply to any pending applications in which a first Office action on the merits (FAOM) has not been mailed before November 1, 2007. Withdrawn claims will not be taken into account in determining whether an application exceeds the 5/25 claim threshold. For more information on the final rule, please see <http://www.uspto.gov/web/offices/pac/dapp/opla/presentation/clmcontfinalrule.html>.

Applicant is advised that cancellation of non-elected claims is required.
